

The Barral Institute (BI) is an international organization providing continuing education and certification based on the innovative therapies developed by world-renowned French Osteopath and Physical Therapist Jean-Pierre Barral, and French Osteopath Alain Croibier.

Learn hands-on from the original developers of the techniques, backed by the credibility and reliability of IAHE. We offer 3-4 day lab-intensive seminars throughout the year worldwide. The material is immediately applicable in any clinical setting as it bridges the needs of various patient populations.

Manual Therapy Seminars Needs of the Complex Patient

Visceral Manipulation Can Benefit:
